

Thanks for trusting us with your site. As a fellow content creator who's been building a profitable golf affiliate site since 2021, I know how much work goes into it. I also know that most creators unknowingly miss out on 15–30% of their income from simple fixes. This snapshot shows you where that money is hiding on your site — David

Executive Summary

OVERALL GRADE

C-

Grade legend

- Grade A: under 25 critical errors, under 50 unmonetized mentions
- Grade B: 25–150 critical errors, 50–200 unmonetized mentions
- Grade C: 150–500 critical errors, 200–700 unmonetized mentions

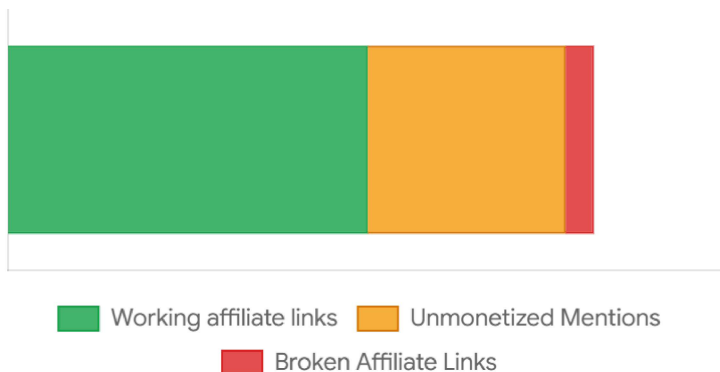

To reach B-: fix top 100 unmonetized mentions, repair 200 broken links, and test 3 higher-paying programs.

Takeaway: Your site demonstrates strong potential, but significant revenue is being left on the table. Our initial scan identified **688 unmonetized brand mentions** and **755 total broken links**. These issues should be the top priority for optimization.

Estimated Revenue Uplift

63%

Modeled lift from top-priority fixes in 30–60 days.

0

UNMONETIZED MENTIONS

0

TOTAL BROKEN LINKS
(98 are high-priority affiliate links)

As of September 4, 2025 • Confidence: Medium (requires traffic analytics)

What this means

You're likely missing 4 figures per year from unmonetized mentions and broken affiliate links, depending on traffic and EPC.

Next 30 days

- Apply to top 10 unmonetized affiliate programs

- Fix top 200 unmonetized mentions based on traffic

2. Full Audit

Prioritized 90-day plan with exact URLs, program swaps, and tracking QA.

3. Implementation

We fix everything for you, then QA and validate conversions.

4. Management

Monitoring, monthly audits, program tests, and reporting.

Appendix: Methodology & Impact Estimation

The ****Estimated Revenue Uplift**** is a projection, not a guarantee, based on actionable opportunities identified during our scan. We estimate uplift based on your site's existing monetized links and traffic (if provided), combined with industry benchmarks and commission rate analysis across our proprietary database of 35,000+ affiliate programs.

For this free report card, the percentage uplift is a simplified calculation to provide a directional estimate. It's derived by summing the number of broken and unmonetized affiliate links and dividing that total by the number of existing, working affiliate links. This method assumes, for modeling purposes, that each link holds a similar potential value.

Example Calculation: A site with 1,251 working affiliate links is found to have 98 broken affiliate links and 688 unmonetized opportunities. The uplift is calculated as: $(98 + 688) / 1,251 = \sim 63\%$.
